1		Buka link : https://colab.research.google.com/gist/risangbaskoro/5f55beee8ae13572e199060730f46507/headless-computer-linux-access.ipynb
2		Klik Run . Tunggu sampai selesai
3		Klik link (buka di Tab baru) https://remotedesktop.google.com/headless
4		Klik Mulai
5		Klik Berikutnya .
6		Klik Izinkan .

7		<p>Copy bagian Debian Linux dengan cara klik icon copy-paste</p>
8	<p>Install VPS</p> <p>Visit http://remotedesktop.google.com/headless and copy the command after authentication</p> <p>CRP: <code>" DISPLAY= /opt/google/chrome-remote-desktop/start-host --code="4/0AX4XfWgiAk52S00pqdl-2qICTjXCF2AcIT7v5y9t9n</code></p> <p>Enter a 6 digits or more pin</p> <p>pin: 123456</p> <p>Access from http://remotedesktop.google.com/access</p> <p>Show code</p>	<p>Paste di form CRP</p>
9	<p>Install VPS</p> <p>Visit http://remotedesktop.google.com/headless and copy the command after authentication</p> <p>CRP: <code>" DISPLAY= /opt/google/chrome-remote-desktop/start-host --code="4/0AX4XfWgiAk</code></p> <p>Enter a 6 digits or more pin</p> <p>pin: 123456</p> <p>Access from http://remotedesktop.google.com/access</p> <p>Show code</p>	<p>Kemudian Run.</p> <p>Tunggu sampai proses instalasi selesai</p>
10	 <p>Installing Chrome Remote Desktop Installing Desktop Environment Installing Google Chrome Installing Transmission Finalizing Finished Successfully</p> <p>Alive for 12 Hours</p> <p>active_12_hours: <input type="checkbox"/></p> <p>Show code</p> <p>... 0 minute(s) of runtime. 1 minute(s) of runtime. 2 minute(s) of runtime. 3 minute(s) of runtime. 4 minute(s) of runtime. 5 minute(s) of runtime.</p>	<p>Setelah selesai</p> <p>Run cell dibawahnya (Alive for 12 Hours)</p>

		<p>Kemudian</p> <p>klik link akses</p> <p>https://remotedesktop.google.com/access</p>
11		<p>Akan muncul mesin yang online</p> <p>kemudian klik</p>
12		<p>Akan diminta PIN.</p> <p>Masukkan pin yang ada di proses sebelumnya yaitu 123456</p> <p>Kemudian Enter</p>
13		<p>Klik use default config</p>

14		Selesai.
15	 <pre> To run a command as administrator (user "root"), use "sudo <command>". See "man sudo_root" for details. admin@b626a01c5b54:~\$ whoami admin admin@b626a01c5b54:~\$ </pre>	Done.

Note : Mesin ini cuman bertahan selama 12 jam, semua file yang lu simpan di mesin ini akan di hapus setelah 12 jam. Jadi usahakan setiap lu nyimpen file di mesin ini lu backup ato pindahkan ke penyimpanan pribadi milik lu.

Setelah session habis (lewat dari 12 jam), Buat lagi dengan ngikutin langkahnya dari awal
